Community Health Needs Assessment
Community Health Needs Assessment & Health Improvement Plan

Siouxland District Health Department, along with Dunes Surgical Hospital, Mercy Medical Center and UnityPoint Health - St. Luke’s complete a Community Health Needs Assessment (CHNA) and Health Improvement Plan (HIP) every three years.

The purpose of **community health needs assessments** is to learn about the community: the health of the population, factors that lead to higher health risks or poorer health outcomes of certain groups, and community resources available to improve the health of the community. The purpose of the **health improvement plan** is to describe how the community will work together to improve the health of the population. The community health improvement plan sets priorities, directs the use of resources, and is a roadmap for the development and implementation of projects, programs, and policies.

The joint CHNA looks at data from the following six counties in the tri-state Siouxland area, as each hospital serves a larger territory outside of Woodbury County:

- Union, SD
- Dakota, Dixon and Thurston, NE
- Plymouth and Woodbury, IA

The top health issues identified for 2019 – 2021 are:

- **Mental Health**
- **Homelessness/Housing**
- **Obesity/Chronic Disease**
- **Sexual Health**
- **Substance Abuse**
- **Access to Healthcare Services**
2019 - 2021 Community Health Needs Assessment
